

## **Notice of a Monthly Surface Water Treatment Violation**

The City of Palestine failed to meet the minimum treatment technique requirements for the month of November 2010, in that we failed to maintain an acceptable disinfectant residual throughout the distribution system for two consecutive months.

TCEQ requires that when a public water treatment system fails to meet the minimum treatment requirements that the public water treatment system must notify the public of this violation.

If you want more information about the nature and significance of this violation, you may contact either Curtis Logan or Brad Thrift at the City of Palestine Water Treatment Plant by telephone. (903)731-8427.

Please share this information with all other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.
